

RICK'S

CUSTOM FENCING & DECKING

Nothing in a home is quite like a beautiful, well-crafted deck. Incredibly versatile, a deck can one minute be a lively kitchen when barbecuing, and moments later a romantic candle lit dining room or a place for quiet relaxation. On frosty winter nights, a deck can be an escape to a warm hot tub.

Our cedar decking line is made from one of our finest woods, Port Orford Cedar. Historically, Port Orford Cedar was the preferred wood for boat building. Master boat builders chose it for its strength, durability and decay resistance. These same unique qualities are present in our products today, just as they have been for generations. Port Orford is a light colored wood, allowing it to stain uniformly. Its fine texture, straight grain, and pleasant, sweet-spicy scent, makes it an excellent choice for woodwork. Port Orford Cedar is fast becoming the first choice of architects, builders and homeowners who appreciate the best decking available. It has exceptional strength value; 45% stronger than Redwood and Western Red Cedars in impact bending and 30% stronger in crushing strength. Its texture remains smooth with no raised grain or splintering, and its durability makes it ideal for use in high-traffic outdoor sites.

Port Orford Cedar Decking comes in 2" x 6", random lengths 6' – 20'.
