Rick's Custom Fencing & Decking add UnderDeck to Product Line

HILLSBORO, OR, March 27, 2007 – Rick's Custom Fencing & Decking is proud to announce its newest product line, UnderDeck. UnderDeck is a new innovative maintenance-free ceiling system that installs to the underside of second story decks. It creates a clean, dry, bright area with positive drainage away from your home allowing you to use your new space rain or shine.

UnderDeck is a new product developed in the late 90's to solve the age old problem of what to do with that wet, dark, ugly space underneath your second level deck. UnderDeck solved the problem by delivering a unique innovative functional yet aesthetically pleasing solution.

Homeowners can now take the unused or under utilized space beneath their second-level deck and turned it into a clean, dry, bright area that can be used for outdoor parties, storage - not to mention the fact that the patio furniture will not be getting wet and dirty anytime soon.

“UnderDeck will be the most economical and valuable addition to your home's square footage”, stated Dave Harkins, C.O.O. at Rick's Custom Fencing & Decking. “You can put it on new or existing decks.”

UnderDeck is made of exterior weatherable grade vinyl with fungicides and anti bacterial additives. The product is very durable and you will never have to worry about maintenance or painting.

Rick's Custom Fencing & Decking offers UnderDeck at all six of their store locations in Hillsboro, Gresham, Salem, Vancouver, Bend, and Tri-Cities.

Visit us at www.RicksFencing.com or stop by one of our store locations for more information.
